

Learn English with Freddy!

Colour Land: English for the 3rd grade

Learning English could be fun for kids! With Freddy, a cute friendly vampire, and his little friend bat Bodo, kids of the 3rd grade will learn English with pleasure. Over 60 assignments combined by topics are explained and commented by Freddy and a real English boy, who will help kids to discover a lot of interesting things and learn English with enthusiasm! Freddy's assistant Bodo will help kids navigate the CD so they can choose a topic, go back and forth to the topic menu or to the next task of the current topic, adjust sound volume, or exit.

The game was developed by The Web Production for Tivola Publishing and Klett Schulbuchverlag.

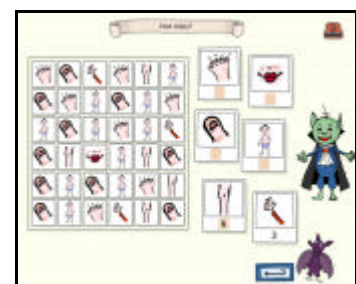

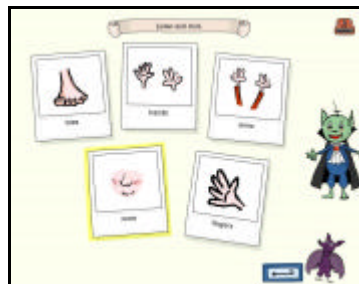

Production Line

The Web Production produces high quality PC and MAC computer games in their entirety. CD media encompasses games with animation, sounds, music, and video. Our highly professional team of more than 75 animators, designers, developers, and programmers develops dynamic and eye-catching games. We also produce educational programs for children. The games consist of puzzles and assignments, which make the educational process simple and enjoyable for children.

Games are developed using the most advanced technologies such as Macromedia Director, QuickTime VR, 3D Studio Max, Macromedia Flash and others. The goal of the enthusiastic and creative team at TWP is to ensure that original graphics and unique animation are developed for each project.
