

**Mouse 2****Production Line**

The Web Production produces a wide range of PC and MAC computer games with high quality animation, sounds, music and video. Our highly professional team of more than 75 animators, designers, developers, and programmers creates dynamic and eye-catching games. We also develop educational games for children that make the educational learning simple and enjoyable. Whether designed to build curriculum and problem-solving skills, or provide just pure fun, our products create unique worlds of interactive discovery for kids.

We produce games using the most advanced technologies, such as Macromedia Director, QuickTime VR, 3D Studio Max, Macromedia Flash and others.

- English for the 1st - 4th Grade with Freddy
- Oscar the Balloonist Discovers the Sea
- The Wild Football Guys

Mouse 2

The Web Production participated in the development of the CD-ROM "Mouse 2" for Tivola Verlag GmbH. It is the second part of the adventures of the Mouse and is for children from 4 to 8 years old.

The Mouse has his birthday party, where many funny things may happen. The children can play games that improve their creativity and provide ideas on how to entertain their guests at a real life party.

The Web Production developed a part of this game called "The Music Machine". It gives the player an opportunity to compose his own music in a very original way. The Music Machine does not compose the music, but draws it! Every music instrument is given its own color and by drawing a multicolor picture, the child creates a polyphonic musical piece. If the player is drawing in the upper part of the screen, the sound becomes higher-pitched, and vice versa. While drawing, the player can hear his melody and change it. The melody can be saved.

The game was produced in cooperation with BVM.

**Features**

- Draw music on your computer with the super creative music machine
- 8 different modules for fun
- 6 exciting games
- 15 minutes of animation
- Hours of educational gameplay and fun clickables
