

Mobile Games

Production Line

Mobile games hold a significant place in our company's activity. Our highly professional team of more than 75 animators, designers, developers and programmers develops dynamic and eye-catching games.

Modern technologies enable us to develop games with great multimedia content. Flash and Java technologies, which allow high quality bitmap and vector graphics, gave the foundation for developing mobile games of a new generation.

At present time mobile games are completely comparable by quality with PC games. They include beautiful 2D and 3D graphics, involved action, high program logic and great number of levels.

We develop both single- and multi-player mobile games of all genres: Arcade, Classic, Logic, Maze etc.

At the Top of Passion

Your task is to climb up the labyrinth and to reach for the boy of your desire. There will be different obstacles on your way and girls you have to avoid or hide in the tent you picked up earlier. To use the tent just press Enter button. After you've passed a level (and there's more than 5 of them) a cute young man will striptease only for you! The game is controlled with the joystick.

Technical Details:

- Type: J2ME
- Sound: yes
- Highscore function: available upon request
- Supported phones: Nokia 7650, Nokia 3650, Siemens S/SL 55, Panasonic GD87, Sharp GX10
